To Whom It May Concern:

I am representing 400 members of the New Haven Bird Club who opposes the Islander East Pipeline. There is no dispute about any of the testimony given before hearings about the dangers of the Islander East Pipeline going through Long Island Sound and also to you on November 5th. In Connecticut we make a special effort to protect the Long Island Sound. We do not want it violated. We do not want it harmed. We do not want the environment irreversibly damaged.

We are a birding group and have a special interest in a birding site in Branford called the "Green Corridor." We are aware that as time goes by we are seeing less and less of our birds. Birding is becoming a skill and birds are becoming harder to find. We want to protect what we have left and ensure that future generations can enjoy birds too.

We are a state in the union who is fighting for our rights of quality of life. Once damaged, the environment cannot be brought back. Each state is dealing with less and less available land and the importance to conserve and protect is now crucial.

Please do not allow this pipeline to go through because we are losing more than we can ever profit.

Sincerely yours,

Maria Stockmal
Conservation Chairperson
New Haven Bird Club
